

# Change your Thunderbird to work with HTC Email powered by Google™

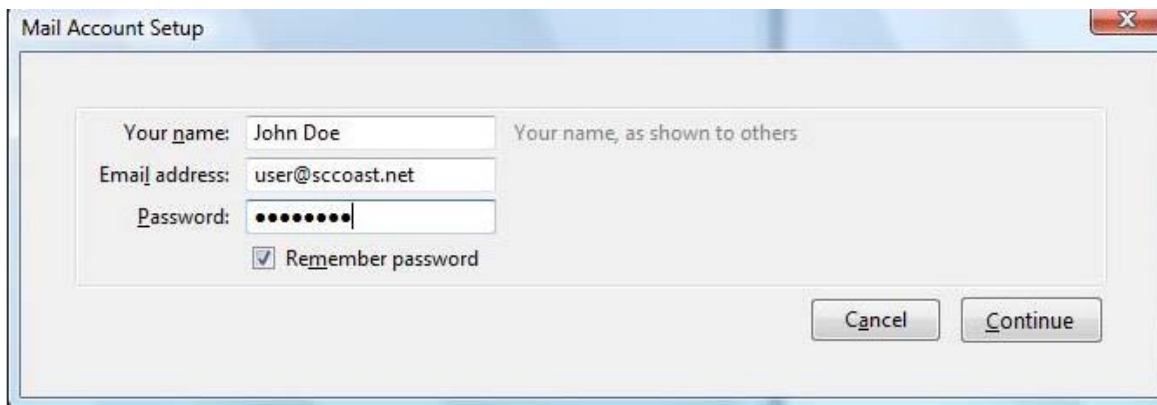

1. Open your Mozilla Thunderbird
2. Click on the **Tools** menu
3. Select **Account Settings**

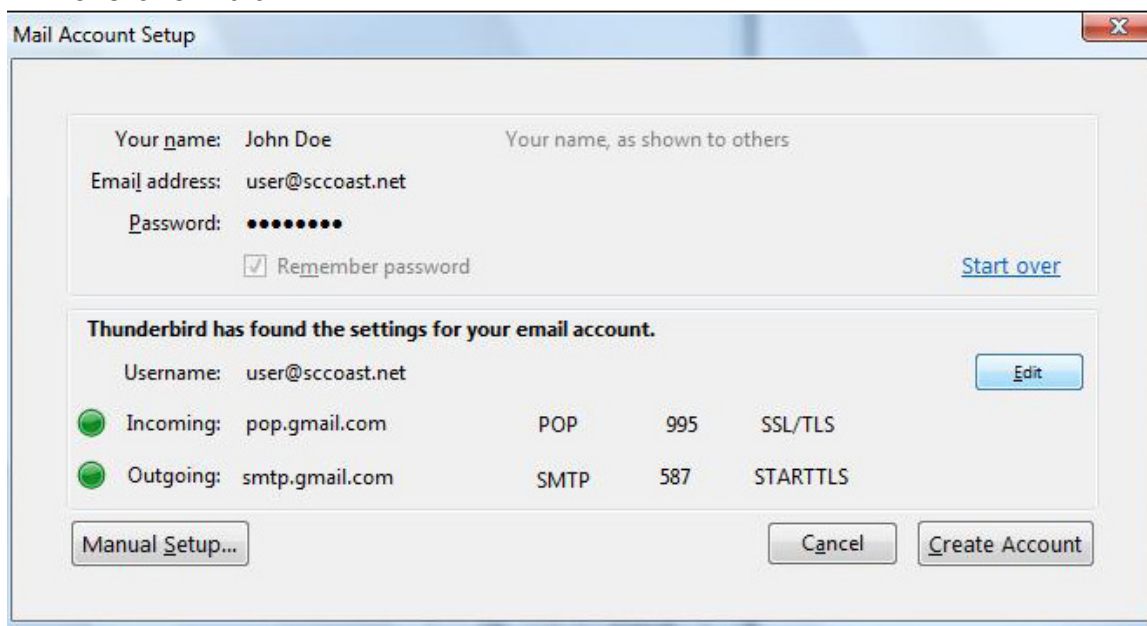

4. Highlight **Add Mail Account**

5. Enter your Name and Email address (include @sccoast.net)
6. Use the HTC provided **Password**
7. Click on **Continue**

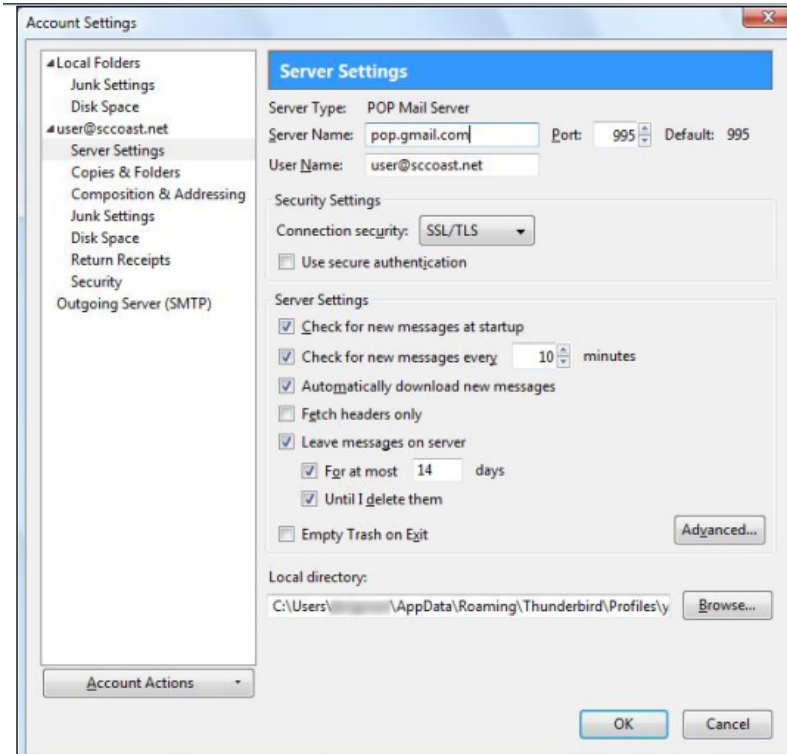

8. Thunderbird will search for proper settings for your email account
9. To prepare for the new HTC Email powered by Google™ you may need to perform a Manual Setup after the results have been returned because the detected settings may not be correct.
10. Click on **Edit**

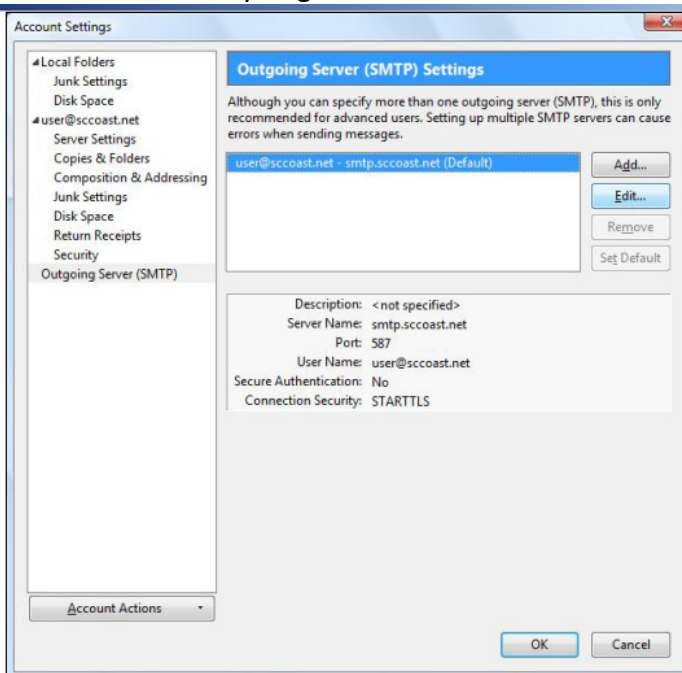

11. Make sure the Incoming fields are populated correctly, if not type the following correct value:  
**pop.gmail.com** **POP** **995** **SSL/TLS**
12. Make sure the Outgoing fields are populated correctly, if not type the following correct value:  
**smtp.gmail.com** **SMTP** **587** **SSL/STARTTLS**

13. Click **Continue**

14. Next you will need to update your outgoing mail server by clicking on **Outgoing Server (SMTP)**

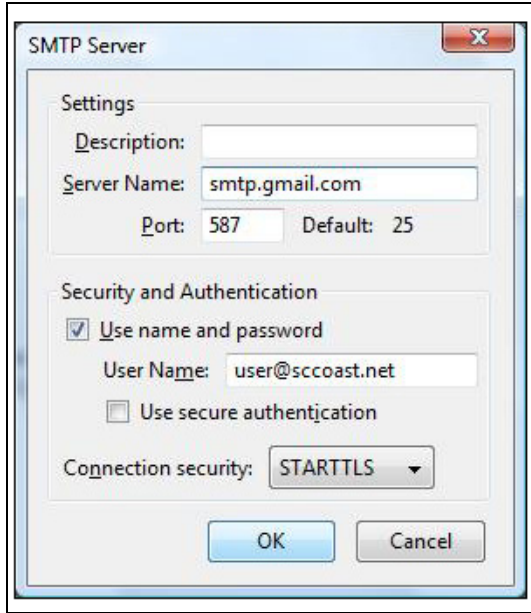

15. Click on **Edit** when you get to the screen below:

16. Make sure the Outgoing fields are populated correctly, if not type the following correct value:

**smtp.gmail.com** **SMTP** **587** **SSL/STARTTLS**

17. Click on **OK**

18. You are finished!
