Step 3 – Add DVR

To add a DVR, you will need to name your DVR and add the Temporary Code found on your set-top box.

The screenshot shows a web browser window with the URL <http://www.htcnet.tv/listings/>. The page is titled "Sign Up" and has a progress bar with three steps: "Create a Username", "Choose Channel Lineup", and "Add your DVR (optional)". A green banner indicates "Success! Thank you for registering!". Below this, there are two input fields: "DVR Name" and "Temporary Code". At the bottom of the form are two buttons: "Add Later" and "Submit". The browser's taskbar at the bottom shows the time as 9:30 AM on 2/21/2013.

To obtain the "temporary code" from the DVR:

- Select the Remote Access button found in the "DVR" or "Set-up" Menu
- Click the "View Code" icon
- The Temporary Code will be displayed
 - Temporary Code is case sensitive
 - Code will expire if not used in a few days, expiration date shown directly under code
 - Code will only be available on boxes not already set-up for Remote DVR scheduling

Pressing the "Submit" button authenticates the DVR with the TV Listings application and you can begin scheduling your DVR remotely.
