(ONT) Optical Network Terminal Installation

(ONT)
Optical Network Terminal
12" X 17"

APC Battery Back up
11" X 9"

Ground Lug

# 6 Stranded copper to ground rod

24"

Conduit

12"

Cat-5E & Coax Inside Wiring

10"

20 amp Disc. to be provided by Builder

4"

Attach strand in fiber drop to ground lug in ONT

40" From ground line

Note: Use 3/4" plywood wrapped in PC coil bordered with J-Channel. This application is recommended for vinyl installations. Horry Telephone strongly recommends that all structural wiring not be looped or daisy chained. All structural wiring should be HOME RUNS to the enclosure from each outlet.
