

(MDU) Muti Dwelling Unit Installation

Note: (3) Cat-5E and (2) Coax from each unit to be terminated here for service. Please refer to (FTTH) Wiring diagram from this point to the enclosure in the unit.

Note: # 6 Ground will pull with the Fiber

Note: Horry Telephone strongly recommends that all structural wiring not be looped or daisy chained. All wiring should be HOME RUNS from each outlet in a room to the enclosure provided by the developer/ builder for each unit.
