

1. On your iPhone or iPad, open **Settings** (typically on the home screen).
2. Locate and tap on **Passwords & Accounts**

3. Click on **Add Account**, then **Other**, then **Add Mail Account**. Now complete the form and tap **Next** when finished.

Cancel **New Account** Next

Name Test

Email test@sccoast.net

Description test@sccoast.net

INCOMING MAIL SERVER

Host Name imap.sccoast.net

User Name test@sccoast.net

Password ●●●●●●●●

OUTGOING MAIL SERVER

Host Name smtp.sccoast.net

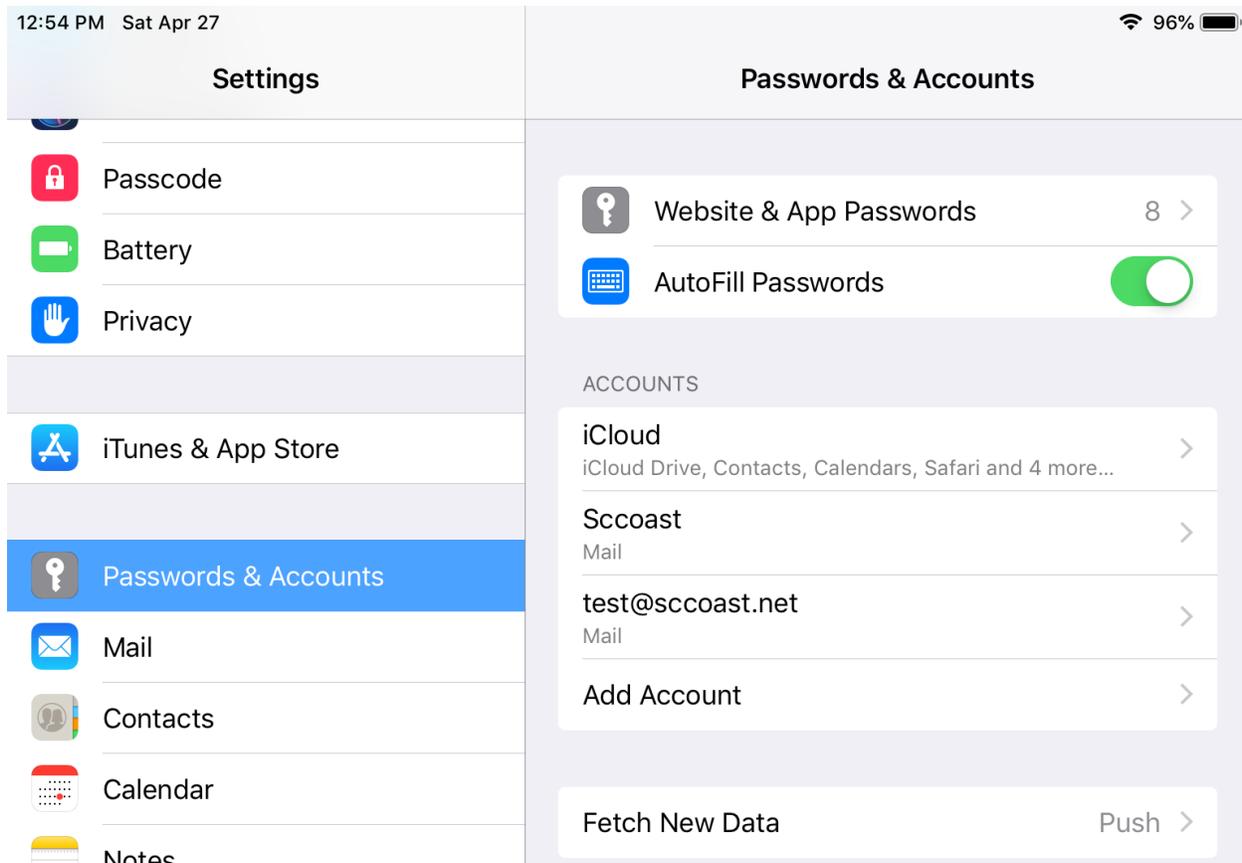

User Name test@sccoast.net

Password ●●●●●●●●

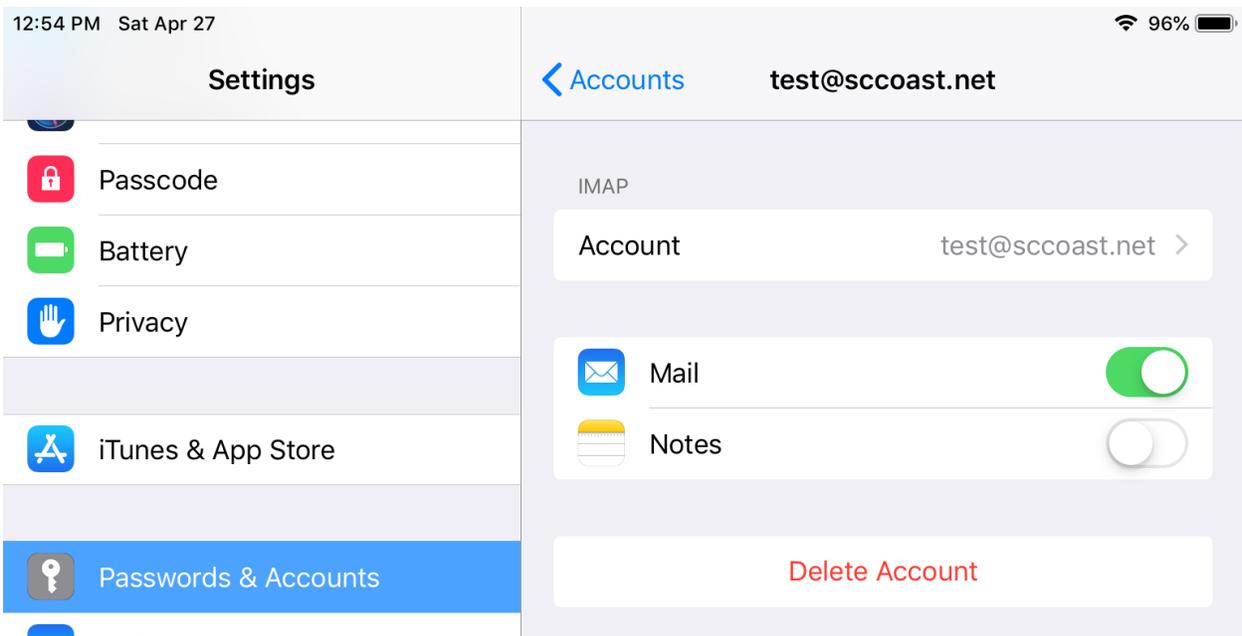

4. Update your **INCOMING MAIL SERVER** settings:
 - a. Edit the **Host Name** field to: **imap.sccoast.net**
 - b. Ensure the **User Name** is your full **@sccoast.net** email address.
 - c. In the **Password** field enter: Your email password. Password is Required

5. . Update your **OUTGOING MAIL SERVER**
 - a. In the **Host Name** field enter: **smtp.sccoast.net**
 - b. In the **User Name** field enter: Your full **@sccoast.net** email address.
 - c. In the **Password** field enter: Your email password. Password is Required
 - d. Tap **Next**.

6. You will then click on your newly added account as pictured below.

7. You will then click your account name once more.

8. You will the tap SMTP as shown below.

The screenshot shows the 'Account' settings page for an IMAP account. The page is titled 'Account' and has 'Cancel' and 'Done' buttons at the top. The account information is as follows:

IMAP ACCOUNT INFORMATION	
Name	Test
Email	test@sccoast.net >
Description	test@sccoast.net

The incoming mail server information is:

INCOMING MAIL SERVER	
Host Name	imap.sccoast.net
User Name	test@sccoast.net
Password	●●●●●●●●

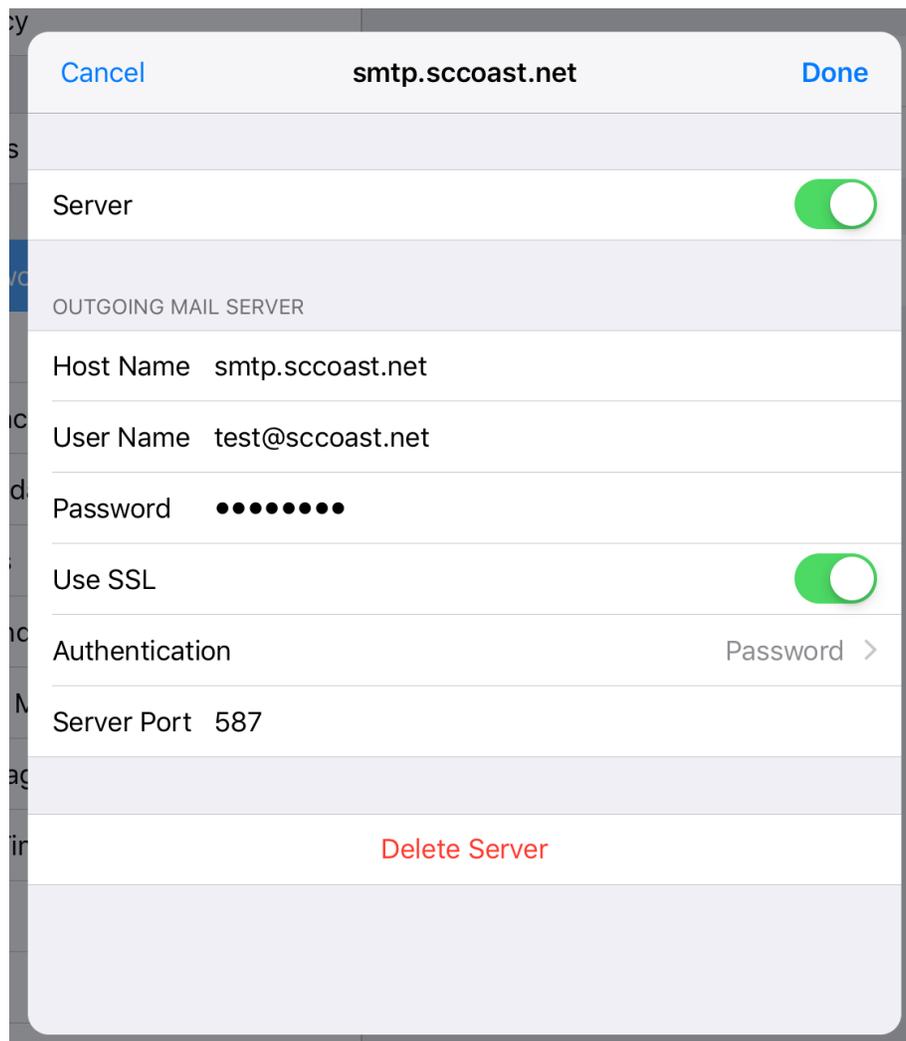

The outgoing mail server information is:

OUTGOING MAIL SERVER	
SMTP	smtp.sccoast.net >
Advanced	>

A red arrow points to the 'SMTP' option in the 'OUTGOING MAIL SERVER' section.

10. Inside your SMTP Outgoing Server

- a. Ensure that your **Host Name** is **smtp.sccoast.net**
- b. Ensure that you **User Name** is your **@sccoast.net** account
- c. Ensure that your password is entered and correct
- d. Make sure that **Use SSL** is turned on (**GREEN**)
- e. Ensure that your **Authentication** is set to password as shown
- f. Server port should be 587

11. Then you will click **Done** and if all information is entered in correctly your newly added account will now be fully functional
